

Canadian commuter e-bikes, sorted out

Five bikes you can buy in Canada for CA\$1,899 to CA\$2,699. Every figure in this guide was read from the maker's own product page on 2026-10-07 - no remembered specs. Prices move, so confirm before you buy.

Disclosure: this guide was not paid for and carries no live affiliate links. Product names link to the makers' own pages. If paid partner links are ever added, they will be labelled as such.

Which one, in one line each

Apartment, stairs, or carrying it onto transit

Velotric Tempo · CA\$2,099

The Tempo is 39 lb, the only bike here you can carry one-handed, and it rides fine with the motor off. Take the small 374 Wh battery as the price of that.

The longest commute on one charge

Velotric Discover 3 · CA\$2,699

Discover 3 claims the longest range in this set (80 mi / ~129 km of pedal assist) on a 730 Wh battery, with lights, fenders and a rack included.

Riding at the legal maximum, on a 400-series highway shoulder or open road

Surface 604 Rook · CA\$2,699

The Rook is the only Class 3 bike here: 45 km/h, and a 960 Wh battery so the speed does not empty the pack by lunchtime.

The cheapest way in, without buying a toy

Rad Power Bikes RadKick 7-Speed · CA\$1,899

At CA\$1,899 the RadKick 7-Speed is the lowest price here and still has hydraulic brakes and a rear rack. Its 360 Wh battery is the honest limit: short trips only.

A bike that feels like a bike, on a long mixed commute

Rad Power Bikes Radster Road · CA\$2,699

The Radster Road pairs a torque sensor with a 100 Nm motor, so the assist follows your pedalling instead of pushing you. It is the heaviest of the five.

The comparison

Cheapest to dearest. Claimed range is the maker's estimate, not a test. Weight is the maker's figure. Where a maker does not publish a figure, the cell says so.

Model	Price (CAD)	Motor	Torque	Battery	Claimed range	Weight	Brakes	Class	Warranty
Radster Road Rad Power Bikes	CA\$2,699	Rear hub, 500 W rated	100 Nm	720 Wh (15 Ah)	40-104 km (maker estimate)	74.5 lb / 33.8 kg	Hydraulic disc	Class 1/2 (ships Class 2)	1 year (Rad warranty page)
RadKick 7-Speed Rad Power Bikes	CA\$1,899	Rear hub, 500 W rated	40 Nm	360 Wh (10 Ah)	24-56 km (maker estimate)	55 lb / 25.2 kg	Hydraulic disc (Gemma GA-950)	Class 2	1 year (Rad warranty page)
Tempo Velotric	CA\$2,099	Rear hub, 350 W (650 W peak)	45 Nm	374 Wh (removable)	up to 97 km (maker estimate)	39 lb / 17.7 kg	Shimano hydraulic disc, 180 mm rotors	Not stated on the product page	2 years
Discover 3 Velotric	CA\$2,699	Rear hub, 750 W (1,100 W peak)	75 Nm	730 Wh (15.2 Ah), Samsung/LG 21700	80 mi / ~129 km PAS (65 mi throttle)	61 lb / 27.7 kg	Tektro hydraulic disc, 180 mm rotors	Class 1/2/3 (20 mph default, adjustable to 28)	2 years (covers electrical)
Rook Surface 604	CA\$2,699	500 W Bafang geared hub (750 W peak)	Not stated on the product page	960 Wh (20 Ah)	up to 150 km (maker, eco mode)	Not stated on the product page	Tektro Auriga hydraulic disc	Class 3 (45 km/h)	5 years frame / 2 years components

Cheapest is not the same as best value: the RadKick costs the least but carries the smallest battery. Match the battery to your round-trip distance, not the price tag.

Which one for which household

Rad Power Bikes Radster Road · CA\$2,699

A long, bike-feeling commute: the torque sensor and 100 Nm motor make pedalling feel assisted rather than motorised. It is the heaviest bike here, so it suits a garage or ground-floor lock-up.

Source: <https://radpowerbikes.ca/products/radster-road-electric-commuter-bike> (checked 2026-10-07).

Rad Power Bikes RadKick 7-Speed · CA\$1,899

Short trips and stairs: Rad's lightest bike at 55 lb, with a rear rack rated 55 lb. The small 360 Wh battery is the trade-off - it is the shortest-range bike in this set.

Source: <https://radpowerbikes.ca/products/radkick-7-speed-electric-lightweight-bike> (checked 2026-10-07).

Velotric Tempo · CA\$2,099

Carrying-up-stairs and mixed bike/motor use: at 39 lb it is by far the lightest here, and light enough to ride with the motor off. The 374 Wh battery is the smallest, so plan short hops or charge often.

Source: <https://www.velotric.ca/products/velotric-tempo-ebike> (checked 2026-10-07).

Velotric Discover 3 · CA\$2,699

The all-round daily commuter: the longest claimed range and the most powerful motor here, with lights, fenders and a rack included. Class 3 unlocking is done in the app, where local rules allow.

Source: <https://www.velotric.ca/products/discover-3> (checked 2026-10-07).

Surface 604 Rook · CA\$2,699

Fast, long commutes: the biggest battery here (960 Wh) and the only Class 3 bike in the set, so it holds 45 km/h legally. Vancouver-designed with in-stock parts and a 5-year frame warranty.

Where every number comes from

Each bike below links to the exact page the figures were read from, on 2026-10-07.

Rad Power Bikes Radster Road - <https://radpowerbikes.ca/products/radster-road-electric-commuter-bike>

Technical Specifications block on the product page (Samsung 50GB / LG M50LT cells, UL 2271). Price from the product's Shopify .js endpoint, CAD.

Rad Power Bikes RadKick 7-Speed - <https://radpowerbikes.ca/products/radkick-7-speed-electric-lightweight-bike>

Technical Specifications / Geometry blocks on the product page (UL-2271 battery). Price from the product's Shopify .js endpoint, CAD.

Velotric Tempo - <https://www.velotric.ca/products/velotric-tempo-ebike>

Key Features block on the product page. Price shown as CA\$2,099.00 CAD on the product page.

Velotric Discover 3 - <https://www.velotric.ca/products/discover-3>

Specification & Geometry table on the product page. Price shown as CA\$2,699.00 CAD (confirmed in the page's JSON-LD, priceCurrency CAD).

Surface 604 Rook - <https://www.surface604bikes.com/electric-bikes/rook>

Product page (motor, battery, class, brakes, warranty) and the site's model-comparison table. Price shown as CA\$2,699.00 (page JSON-LD: priceCurrency CAD). This model showed Out of Stock on the date checked.

Two caveats worth naming. Claimed range is the maker's figure and depends on rider weight, hills, temperature and assist level. Weight is the maker's figure too. Where a maker does not publish a figure on the page we read, this guide says so rather than guessing. This is general product information, not advice about your riding or your province's e-bike rules - check those before you buy.
